Kathy Snyder-Garrett

This month is an update on the Immigration bill that is working its way through Congress. The Senate passed their version of the bill a few weeks ago after passing a controversial amendment. This amendment would deploy 20,000 more border patrol agents, build 700 miles of border fencing and require employers to use e-verify. This sounds good on the surface, but there is no language in the amendment requiring these things prior to illegal immigrants being given their green cards. So, current illegal immigrants will be citizens long before this is implemented and many more who have yet to cross the border will also become citizens. This amendment was supported by many Republican Senators in an effort to appease conservatives. But due to no enforcement, the bill is no different than laws already in place that are not enforced.

The House is currently working on a handful of smaller immigration bills that deal with specific parts of our immigration reform needs. One bill would toughen enforcement of immigration laws, allowing local law enforcement to enforce laws and leading to more deportations. It was also encourage current illegals to leave voluntarily. Other bills in the works would create a mandatory system to verify the legal status of workers. The number of visas for employees of technology companies would increase and a new temporary program for farm workers would be created. These were some of the ideas discussed by House leadership in a closed door meeting recently. Speaker John Boehner stated the House would not vote on the Senate bill, but instead focus on these smaller bills to make sure meaningful immigration reform passes.

The biggest complaint about immigration is that we don't enforce the laws we already have and the border is not secure. The Senate bill does not accomplish either. The House bills potentially help with enforcement, but do we really need to pass a law telling us to enforce other laws? In reality, we should just enforce existing laws and write new laws that make it easier to get into the country legally. But until we close the border, the rate of illegals entering the country will continue to increase dramatically.
